

HyperSolutions

"MediaScreen1" Technical Specifications

All artwork should be provided as high resolution files. We accept most standard disc formats: CD or Zip. Please prepare files in Illustrator, Photoshop or InDesign. Save all images as CMYK Tif files.

Please Layout Files With Pantone Colors & Include Color Proof For Each Display.

Job Completion Time:

1. Production of 1-10 prints require 7-10 working days upon receiving file. (Depending on quantity and production capacity).

File Preparation:

1. Resoluton of at least 100 dpi @ 100% size or equivalent.(200 dpi @ 50%, 400 dpi @ 25%)

Fonts:

1. Include both printer and screen fonts.
2. Indicate programs used and version (Please include any special extensions).
3. Provide color copy of image for reference and image placement.
4. Send any guidelines or prints samples for approximate color matching.

Tips for Preparation:

1. When creating 4-color black we recommend: 60% C, 40% M, 40% Y, 100% K
2. Doutones and RGB Photo files should be converted to CMYK.
3. Tints and color gradients less 5% WILL NOT print.

Scanned images:

1. Scanned images should be created as Tiff in CMYK, (at least 100 dpi at final output size) desired colors are specified in CMYK Pantones. Exact color matches are not always possible. Pantone specifications allow us to match colors closest.
2. Logos and images that can be, are created and kept in outline formats (.ai/eps)

Design Services:

1. Transparency scanning is \$85.00 per image.
2. Layout services are \$95.00 per hour (1 hour minium).
3. If you require a 9" x 23" proof, please add \$45.00 + shipping.
3. Please allow a few extra days for job completion.
